

Third Party Connectors

NVIDIA's Omniverse is a powerful platform for creating and collaborating in real-time. With the help of 3rd party connectors, you can now extend the capabilities of Omniverse to include a wide range of applications and services. From CAD to VR, these connectors will help you get the most out of your Omniverse experience.

Icon	Connector	Developer	Description
	A23D	A23D	Connector to the A23D library, which provides 3D assets for various applications like 3D modeling, virtual reality, augmented reality, gaming, architecture and interior designing.
	ActorCore	Reallusion	ActorCore is a cloud-based, fully-rigged 3D character and mocap motion library for fast animation creation, allowing users to quickly search, view, and download photorealistic 3D people and animations for crowd scenes in AEC simulations and visualizations, games and films.
	CGTrader	CGTrader	Pull USD models directly into Omniverse from the world's largest source for licensable stock and custom 3D models.
	Character Creator	Reallusion	Reallusion Character Creator Omniverse Connector is a plugin developed by REALLUSION to easily transfer digital humans, accessories, motions, and materials from Character Creator to Omniverse.
	E-ON PlantCatalog	E-ON	PlantCatalog is the premier solution for high quality, botanically accurate vegetation models with infinite customization at customizable mesh resolutions. The PlantCatalog Omniverse

Icon	Connector	Developer	Description
			extension allows you to send exported USD vegetation assets back to PlantCatalog Exporter. With the extension, all of your USD vegetation assets remain procedural, even after export.
	E-ON PlantCatalog	E-ON	The PlantFactory Omniverse extension allows you to send exported USD vegetation assets back to PlantFactory and includes a native unidirectional Live Sync connector that allows streaming your vegetation asset modifications in real-time to your Omniverse stage.
	E-ON Vue	E-ON	VUE is the all-in-one solution for creating natural 3D environments. This https://info.e-onsoftware.com/omniverse unidirectional live sync with Omniverse lets you export entire VUE scenes as USD and then edit them further in VUE.
	HDR Light Studio Extension	Lightmap	The HDR Light Studio Extension creates a live link between HDR Light Studio software and NVIDIA Omniverse, allowing users to create bespoke HDR lighting setups.
	iClone	Reallusion	iClone Omniverse Connector is a plugin developed by REALLUSION for transferring characters, motions, props, cameras, and lights from iClone to an NVIDIA Omniverse Nucleus Server.
	ipolog	Ipolog gMBH	The ipolog Omniverse connector enables planners to share their planning scenarios in NVIDIA Omniverse, contributing to a holistic digital twin in

			manufacturing. Material provisioning domain semantics is supplied with ipolog element meta information.
	Marvelous Designer	CLO Virtual Fashion	Through data exchange with the Omniverse platform using USD, collaboration workflows are accelerated for modeling/simulating cloth and fabric in Marvelous Designer.
	RADiCAL	RADICAL	RADiCAL Live enables real-time, multiplayer 3D motion capture for Omniverse for everyone, everywhere, from any device.
	Shapeyard	Magic Unicorn Inc.	The Shapeyard Connector allows users to create, texture, and export 3D models from iOS into Omniverse through the USDZ format.
	Sketchfab	SKETCHFAB	Sketchfab makes it easy to quickly find and import free Creative Commons-licensed models and purchased Sketchfab Store assets from its vast, diverse, and high-quality content library.
	Style3D	Linctex	Style3D Omniverse Connector can export 3D garments as USD format and send data to an Omniverse Nucleus server.
	Turbosquid	Turbosquid	Omniverse empowers teams located anywhere to collaborate live between their favorite 3D applications using USD and MDL, and TurboSquid has a massive library of 3D models to begin creating within Omniverse.

Icon	Connector	Developer	Description
	Twinbru	Twinbru	Connect to Twinbru Fabrics, a library of high quality digital twin fabric textures from an exact, scanned replica of a physical fabric, which can be ordered and used in the real world.
	Visual Components	Visual Components	The Visual Components Omniverse Connector is a plugin that facilitates bi-
